Smart Pest
Management

Smart live multi-catch
mouse trap

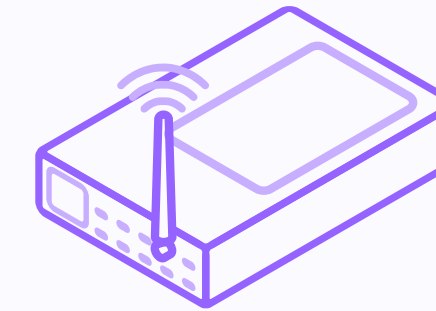

CRM System

Bait station

Smart multi-catch trap and Trojan CRM system save more than 70% of working time, we are a digital pest control technician who works 24/7

Our goal is to safeguard **HUMAN HEALTH**, food safety, and property integrity through automated pest control by implementing Smart equipment and a multifunctional CRM system.

Smart live multi-catch trap

- One year of 24/7 battery life
- Instant notification when a pest is caught

Professional CRM

- 70+% saving physical working time
- Professional reports
- Automatic statistics and analytics

Smart bait station

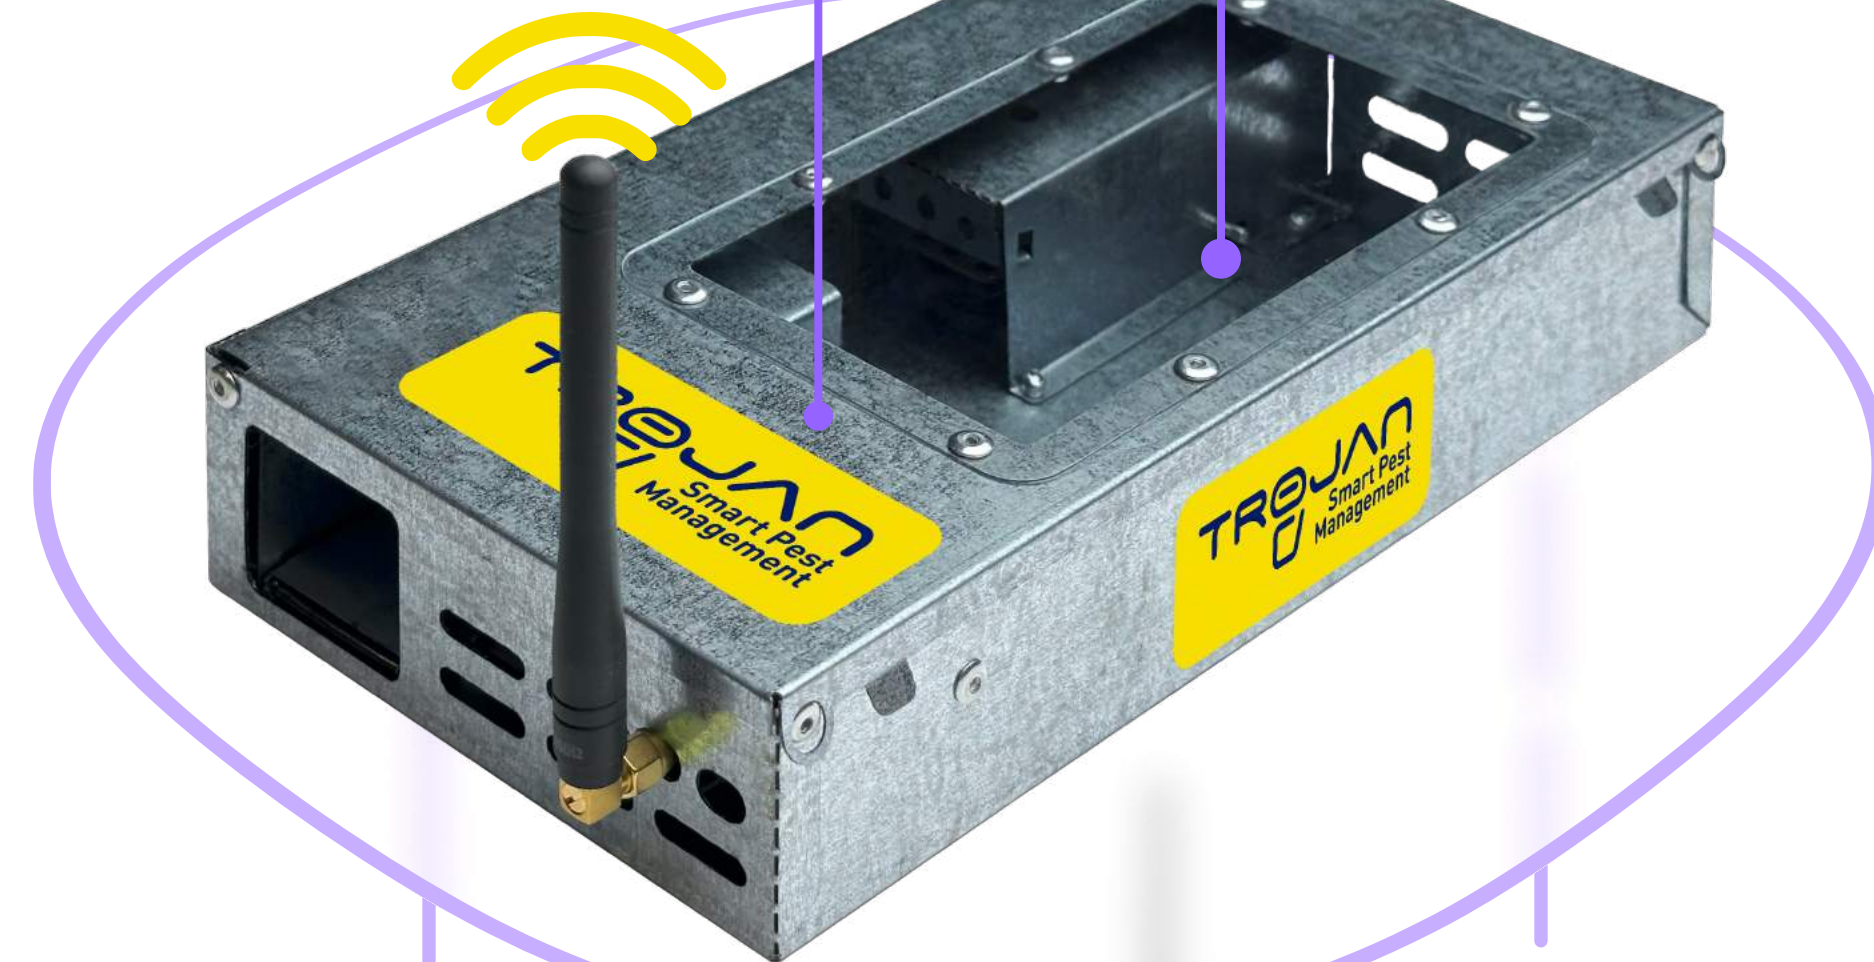

- smart monitoring of bait consumption
- quantity of bait consumed
- time period of consumption

VAL-E

Smart Multi-catch trap

Up to 15 mice

1 year of autonomous work

≤ 1 km

≤ 4 floors

Trojan HUB

Advantages:

- We use a LoRa communication module, so we can send a signal up to 1 km away
- Thanks to a powerful battery, the trap has a year of battery life
- Combining with other smart traps and comprehensive analysis of the infestation by the AUTO ecosystem (Trojan CRM)
- Catches up to 15 mice with display of exact time, number, and direction of movement in Trojan CRM (AUTO)
- A live trap is a humane method of catching a living creature
- It is waterproof and dustproof IP 65 (under development)
- Diverse trap color options
- One of the most used and practical designs for commercial (pest control)
- No rodenticides - no poisonings

Bait station

Smart bait station

1 year of autonomous work

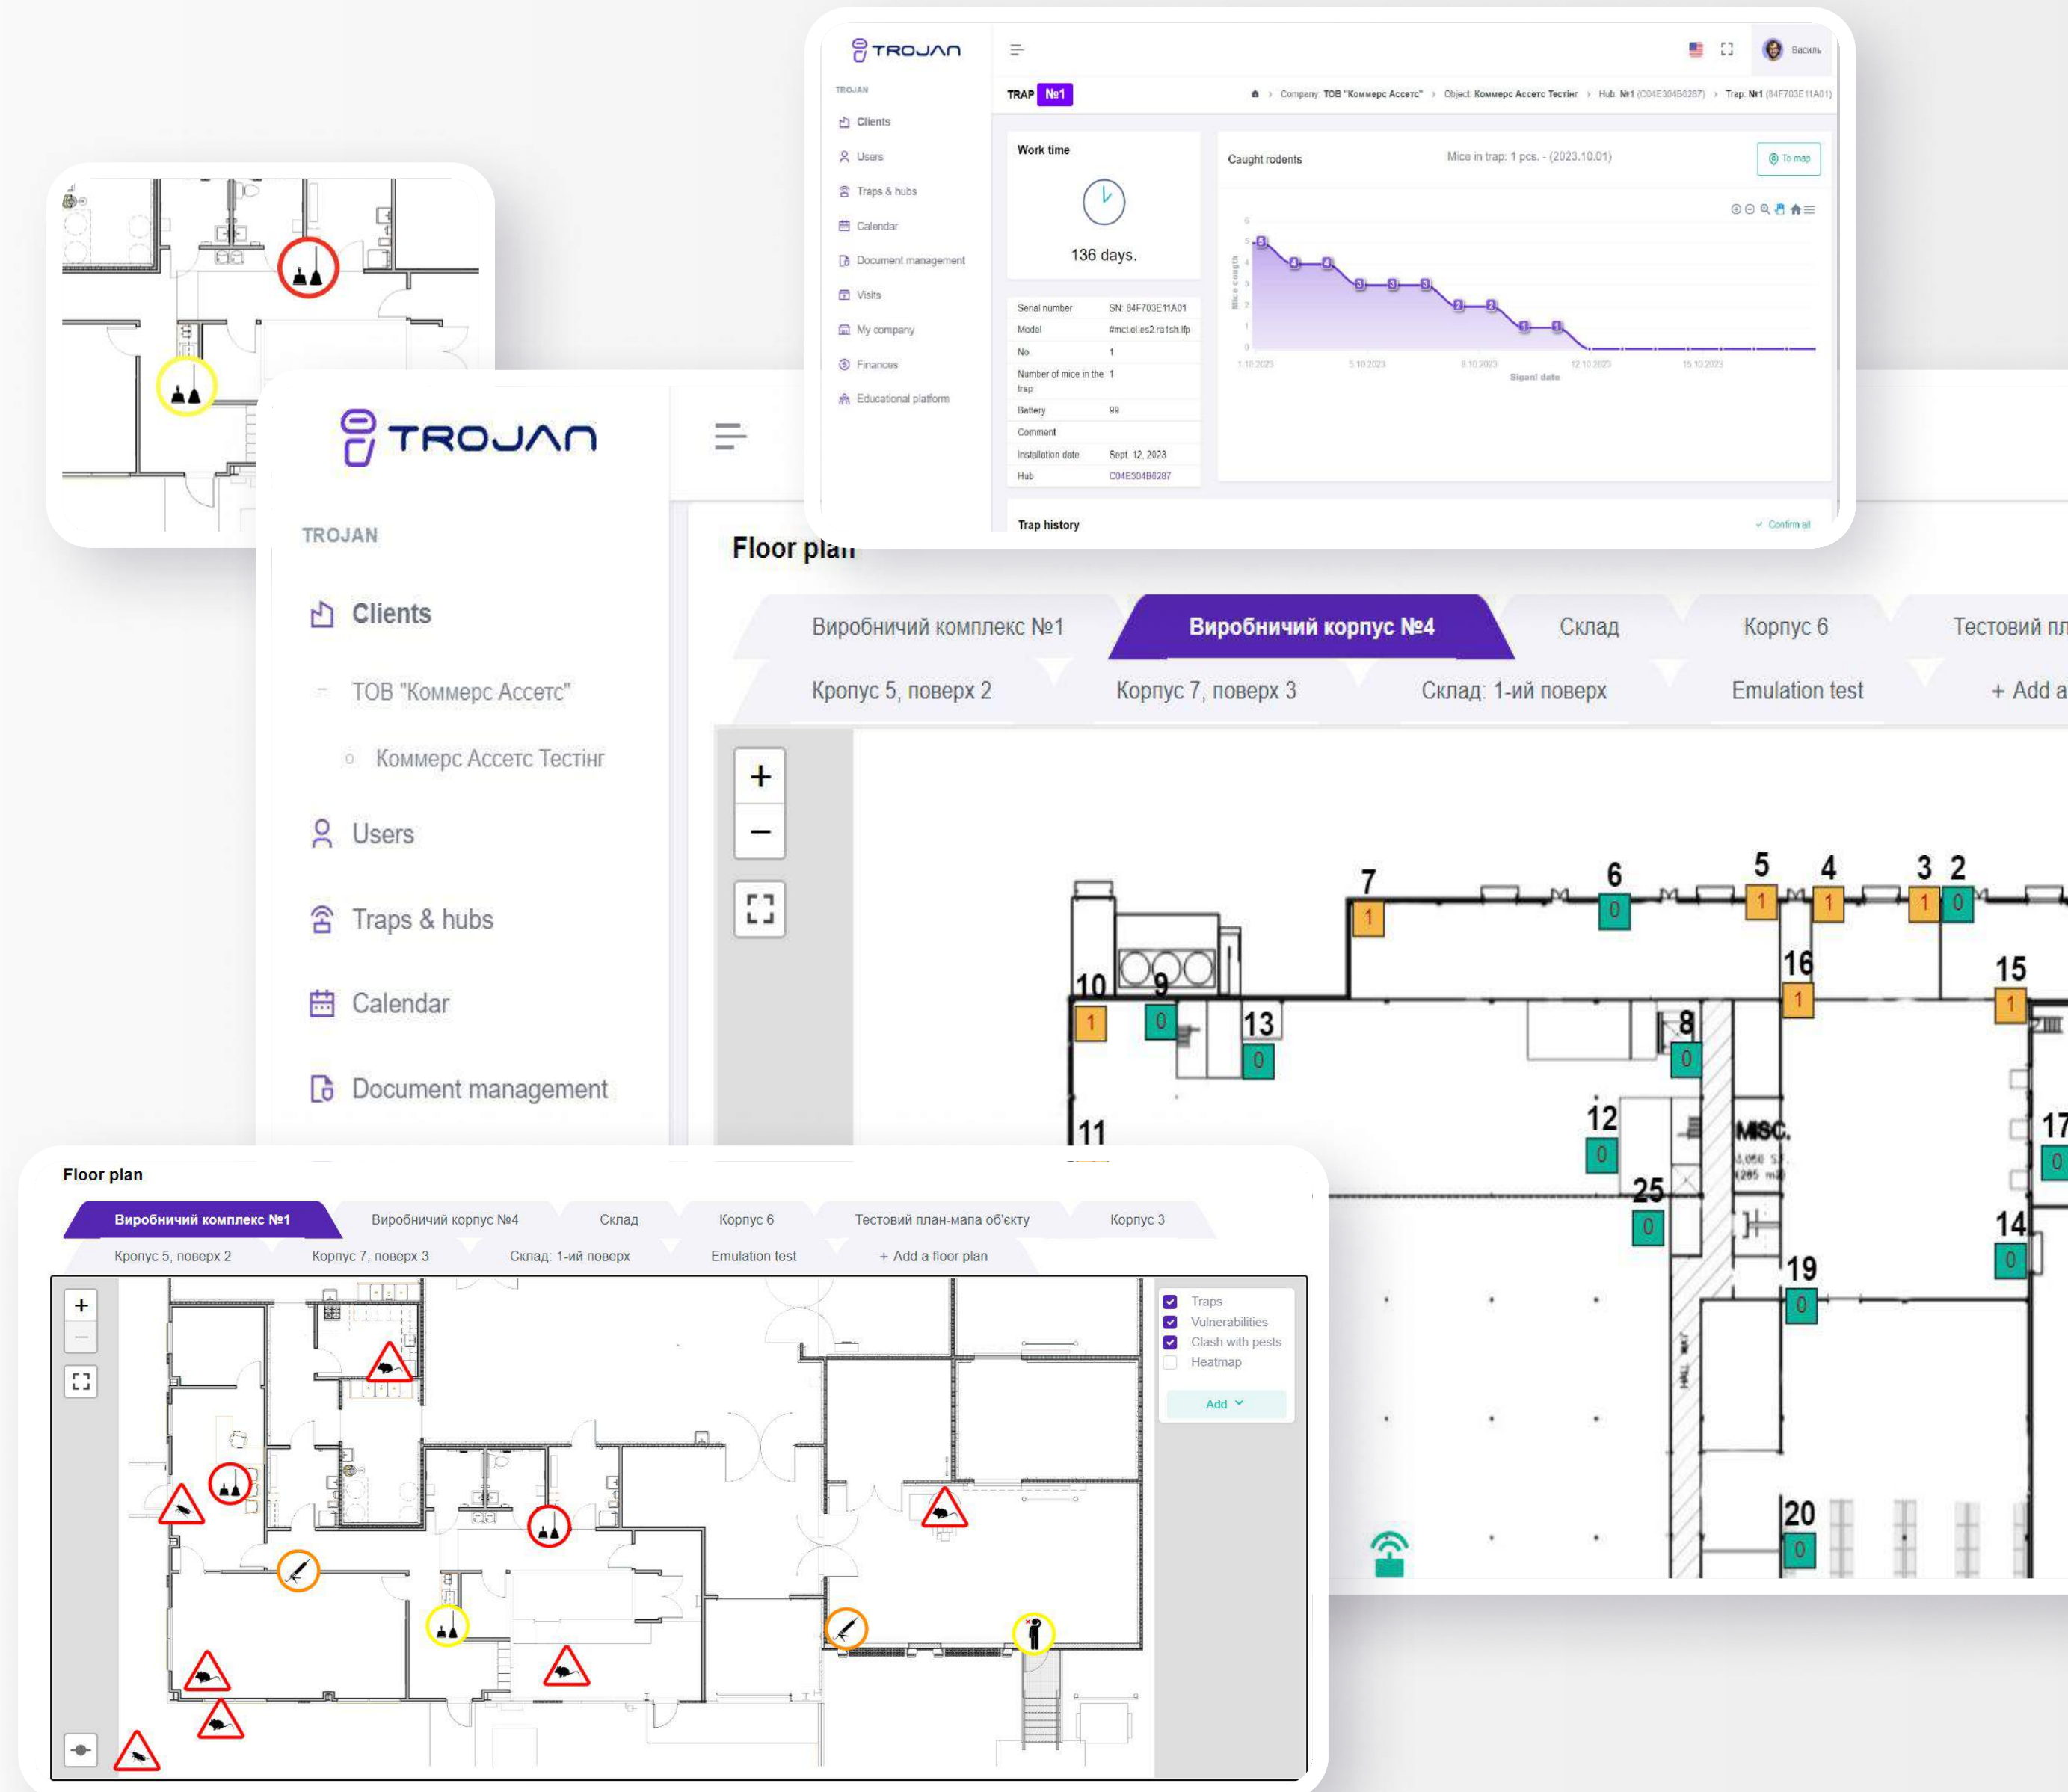

Advantages:

- Receive information remotely
- Smart module for bait station
- Smart monitoring of bait consumption
- Displays the amount of bait consumed in grams and the time period of consumption in Trojan CRM (AUTO)
- We use a LoRa communication module, so we can send a signal up to 1 km away
- Thanks to a powerful battery, the trap has a year of battery life
- Combined with other smart traps and comprehensive infection analysis of the AUTO ecosystem, including analytics and heat map (Trojan CRM)
- It is waterproof and dustproof IP 65 (under development)

CRM

Features:

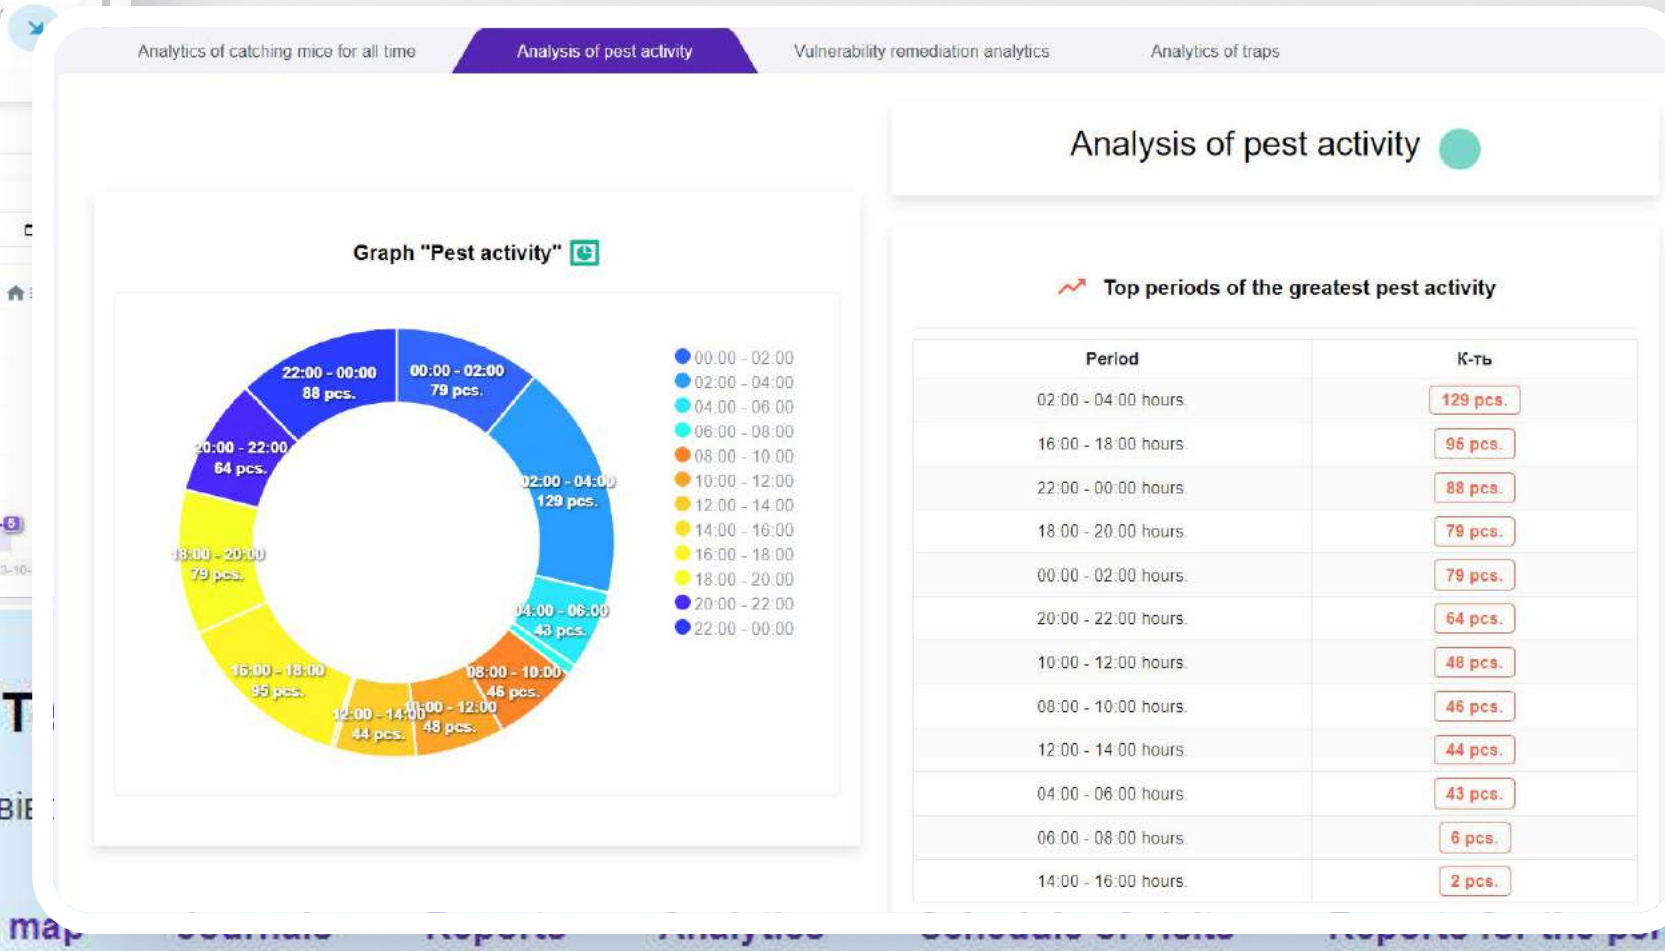

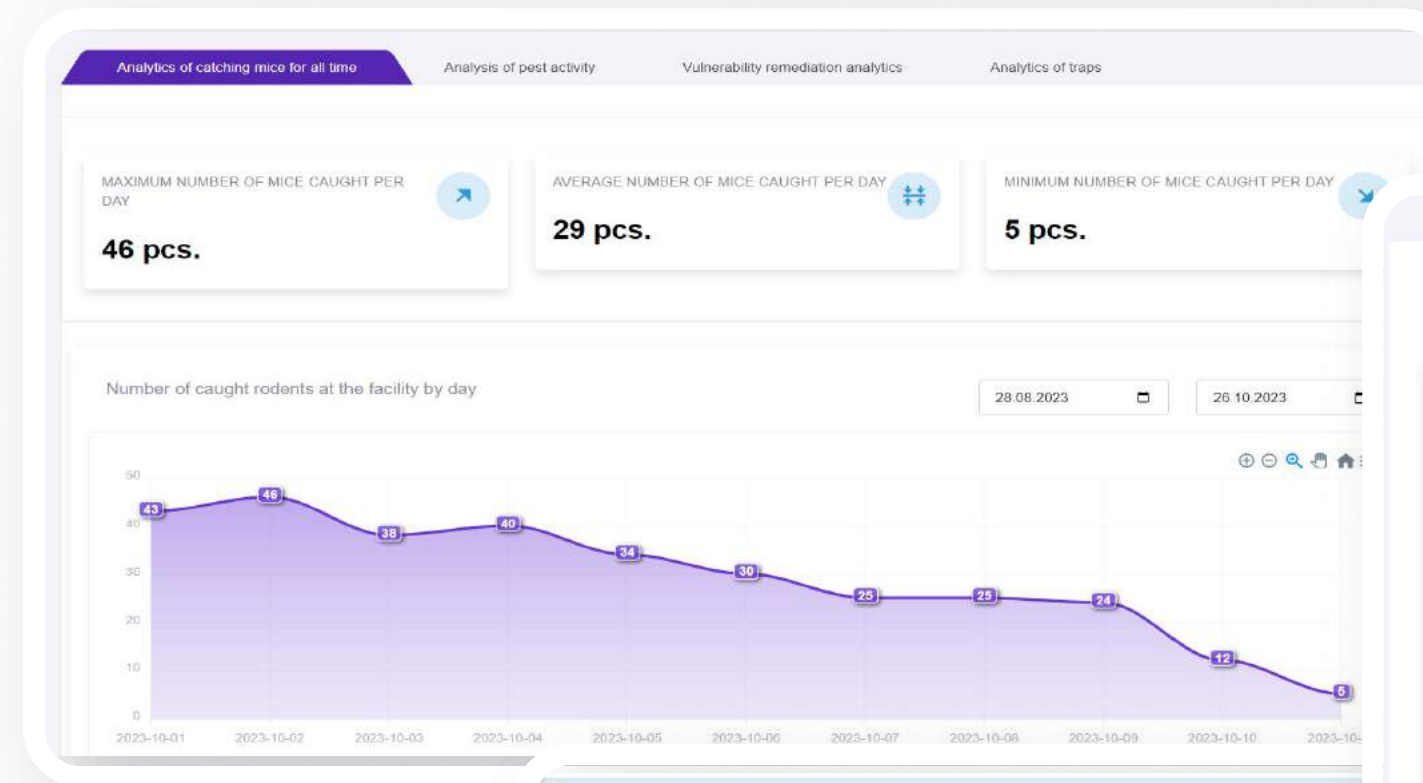

- **Information from the traps:** Find out which trap caught mice, where, when and how many
- **Interactive map:** Get a visualization of your facility and control points of traps and vulnerabilities
- **Vulnerabilities:** Get information about the vulnerabilities at your facility, their criticality and the timeframe for remediation
- **Pest encounters:** Have you noticed pests or traces of their activity? Report it by placing a mark on the map and indicating the time

CRM

Features:

- **Statistics/Analytics:** Control the situation at your facility with high-quality analytics!
- **Electronic document management:** Always at hand digital documentation
- **Visit log:** View the schedule of visits of pest control specialists online!
- **Reports:** Access all pest control reports 24/7 from anywhere in the world!

Trojan AI for insects

Smart AI supervisor (in development)

Advantages:

- Distinguishes the types of insects caught
- Counts the number of insects of each species
- Calculates the filling of the adhesive surface in percent
- Photo analysis on request
- Conducting analytics in the CRM system
- The basis for creating smart traps for flying and crawling insects

How it works

1 We are setting Smart Lora Trap

2 It is connected to the CRM system by HUB

3 Notifies immediately in CRM and messenger about the catch

4 CRM:
• Reports
• Analytics/statistics
• Interactive map...

5
• Remote monitoring
• Saving time / resources
• Increasing efficiency
• Job satisfaction
